

SWUNG Hackathon 2019

Attila Balazs - Machine Learning Specialist and Principal Consultant @Venture. This week Attila helped to organise and participated in the SWUNG hackathon 2019. Over the weekend there were over 45 geo-scientists working on sprints, participating in tutorials and hacking on projects.

Attila said: "I learned a lot working with [Douglas McClymont](#), [Lukas Mosser](#), [Monica Norman](#), [Ian McNair](#), [Evgeniy Markin](#), [Khushal Adlakha](#), trying to reproduce research about Velocity Models and creating an interactive notebook for geophysicists to explore different parameter combinations."

You can see the results on github here <https://lnkd.in/gufjxUU>

Attila would like to thank all the wonderful sponsors for supporting the event.
